Meeting 2 Notes
- App gathers results, she aggregates and shares
- Companies do not have direct access
- Poll changes to accommodate utility provider
    - In addition to general questions
    - Company specific questions, general questions

- Homeowners are main users (poll respondents)
- How do utilities get the results?
    - App will gather results
    - Scientist will aggregate results
    - Utilities don't need direct access
- Part of app is based on specific utility provider
    - Info is relevant to utility
- Polling section has utility agnostic section
- Provide info after getting selected utility
- Someone can select to not have a utility and skip to utility-agnostic questions
- Info and questions are disjoint
